SEA BULK[®] POWERLINER[®]

This bulk container liner is designed to retain all liquids released by high moisture content products which can contaminate the shipping containers, ocean vessels, rail cars and most importantly the environment by preventing any leakage.

SEA BULK® POWERLINER®

Ideal For The Transport Of: Animal Hides & Mine Tailings

Material: Extruded polyethylene film body, sewn woven polypropylene

Bulkhead: Fold down for forklift access

Loading System: Forklift, Bucket Loader, manual

Discharge System: Forklift, Bucket Loader, manual

All Powertex liners are available in various material types. The type of material that will be required for your application will all depend on the type of product that you are shipping and the various characteristics that it has.

Examples of Materials:

- FDA approved virgin grade fully extruded 5.5 mil polyethylene film with metallocene
- FDA approved virgin grade fully extruded 7 mil polyethylene film
- Anti-static polyethylene film (available in both conductive and dissipative)
- Polyethylene/Polyethylene Terephthalate (PE/PET)
- Polyethylene or polypropylene woven material in various grades (95GSM - 230GSM)
- Aluminum laminate (metalized) woven material
- Powerfoil (for use with products that require oxygen and moisture barrier properties)
- Fully extruded polyethylene film with flame retardant properties

NOTE: Material specifications and material samples are available upon request.
